Experience

Consultant, EY

October 2018 - Present

- Improved database procedure performance by 60% by optimizing SQLScript statements
- Helped business reconcile accounts by proposing design to document intercompany suspense balances
- Helped business prepare year end reports by creating reports to document and evaluate financial impact of erroneous transaction
- Developed and documented end to end process for FBO bank account setup

Application Developer, IBM

December 2014 – September 2018

- Coached and mentored junior software developers and held training sessions to facilitate knowledge sharing, professional growth and expedite the transfer of significant development and operations responsibilities to an offsite development team
- Developed various reports, interfaces, conversions, enhancements and forms as per business requirements for MM, PP, PS, OTC, RTR and RTC modules
- Contributed in multiple end to end implementation projects for Matthews Internationals, Tapestry Inc. and Zalora.
